Subject: another call about NVF

---

Tom - we got another very persistent resident caller about NVF. I am obligated to call this one back. Do you see any reason why I should not forward the contact information you forwarded to me to this caller. I think they have complaints about the demolition of the facility. These are local issues and I think I would normally pass the caller off to local authorities and Site owners. I don't want to dump on Kennett, but the current land usage and operation is a local permitting issue. Other than a scary fire in their backyard, is there some other lingering local issue going on ?
